How to Split the Video in a DirectShow FileEncode Sample. How to Split the Video in a DirectShow FileEncode Sample. How to Split the Video in a DirectShow FileEncode Sample..re talking about more than just the money. If Microsoft can deliver as advertised then the OS will probably become a steal when compared to \$5 a month. I hope. It's a pretty decent OS and I think it's going to be pretty useful for those who can't afford an iPad or another tablet. I've had an iMac with Boot Camp for a few years now. It's been very reliable and I haven't had any issues with OS X. More recently I've been using a Mac Mini (Boot Camp) which is a very basic computer for running a web server or other network applications, but it's also capable of running Windows... as can the newer iMacs. It's not a perfect solution (there are issues in Windows with graphics and USB), but it can be a way for those with tight budgets to also access web applications and other applications without an iPhone or iPad. I have a MacBook Pro and have used Boot Camp to install Windows. From what I remember, it worked pretty well. If I wanted to run another OS I'd just use my Mac Mini... traviss I've been using the ipad for less than a year. I was using my iphone previously and I didn't like it that much. I found myself more locked into the app store for trying to get apps. The ipad is more for browsing the web, reading, and emailing. All of which are things I do on my iphone but doesn't require apps from the app store and I found I was browsing through more. The browser is great. Quick and simple. I like that. The rest of it is what I like about the iphone. I have a lot more memory to play with on the ipad. I would love to get an android as well, but the app store is actually quicker and more pleasant for browsing through and downloading apps. I
